December 2014

ENVIRONMENTAL SOFTWARE SYSTEMS, Volume 7

Dimensions of Environmental Informatics

SECOND EDITION

This volume contains a newly compiled version of the Proceedings of the 7th International Symposium on Environmental Software Systems 2007 (ISESS 2007), published by the International Federation for Information Processing (IFIP) under ISBN 978-3-901882-22-7.

The original version was a USB with individual PDF articles linked together. This SECOND EDITION contains the complete proceedings as one document and has been produced with permission of the copyright holder, IFIP and IFIP WG5.11 “Computers and Environment”.

The intention behind creating this SECOND EDITION was to make those volumes of ENVIRONMENTAL SOFTWARE SYSTEMS easily available on-line which are not available through a commercial publisher.

This edition has been created based on the original PDFs on the USB. A new table of contents and dividing pages between the chapters have been added. Where easily possible, a few technical and printing errata have been corrected during compilation.

This edition is permanently available at

<http://www.enviromatics.org/isess/2007.ISESS.Proceedings.pdf>

The original USB version is permanently available at

<http://www.enviromatics.org/isess/2007.ISESS.USB.zip>

IFIP – The International Federation for Information Processing

IFIP was founded in 1960 under the auspices of UNESCO, following the First World Computer Congress held in Paris the previous year. An umbrella organization for societies working in information processing, IFIP's aim is two-fold: to support information processing within its member countries and to encourage technology transfer to developing nations. As its mission statement clearly states,

IFIP's mission is to be the leading, truly international, apolitical organization which encourages and assists the development, exploitation and application of information technology for the benefit of all people.

IFIP is a non-profitmaking organization, run almost solely by 2500 volunteers. It operates through a number of technical committees, which organize events and publications. IFIP's events range from an international congress to local seminars, but the most important are:

- The IFIP World Computer Congress, held every second year;
- open conferences;
- working conferences.

The flagship event is the IFIP World Computer Congress, at which both invited and contributed papers are presented. Contributed papers are rigorously refereed and the rejection rate is high.

As with the Congress, participation in the open conferences is open to all and papers may be invited or submitted. Again, submitted papers are stringently refereed.

The working conferences are structured differently. They are usually run by a working group and attendance is small and by invitation only. Their purpose is to create an atmosphere conducive to innovation and development. Refereeing is less rigorous and papers are subjected to extensive group discussion.

Publications arising from IFIP events vary. The papers presented at the IFIP World Computer Congress and at open conferences are published as conference proceedings, while the results of the working conferences are often published as collections of selected and edited papers.

Any national society whose primary activity is in information may apply to become a full member of IFIP, although full membership is restricted to one society per country. Full members are entitled to vote at the annual General Assembly, National societies preferring a less committed involvement may apply for associate or corresponding membership. Associate members enjoy the same benefits as full members, but without voting rights. Corresponding members are not represented in IFIP bodies. Affiliated membership is open to non-national societies, and individual and honorary membership schemes are also offered.

TABLE OF CONTENTS

PREFACE AND INTRODUCTION

Introduction <i>David A.B. Swayne, Jiří Hřebíček</i>	2
---	---

KEYNOTES

Data streams: another step towards processing environmental data <i>Jaroslav Pokorný</i>	4
Enabling environmental knowledge and services in Europe through ICT research <i>Márta Nagy-Rothengass, Michel Schouppe</i>	5
Environmental Information Infrastructures in Europe – Where are we? What next? And what then? <i>Ralf Denzer</i>	6
Environmental Information Space I. Theory and Practice <i>Jiří Hřebíček, Jaroslav Ráček</i>	7

NEXT GENERATION OF ENVIRONMENTAL INFORMATION AND RISK MANAGEMENT SYSTEMS

Application of Semantic Services in ORCHESTRA <i>Ulrich Bügel, Désirée Hilbring, Ralf Denzer</i>	19
Cartographic Functionalities for Risk Management <i>I. Iosifescu-Enescu, A. Neumann, L. Hurni, R. Gogu</i>	31
From Measurement Data to Environmental Information: MARQUIS - A Multimodal AiR QUality Information Service for the General Public <i>Leo Wanner, Daniel Nicklaß, Nadjat Bouayad-Agha, Bernd Bohnet, Joachim Bronder, Franciso Ferreira, Rainer Friedrich, Ari Karppinen, Francois Lareau, Achim Lohmeyer, Alejandra Panighi, Sergi Parisio, Helmut Scheu-Hachtel, Joao Serpa</i>	43
Implementation of an operational flood warning system for an alpine catchment with a state and event driven system <i>G. Smiatek, H. Kunstmann, A. Marx, J. Werhahn</i>	54
Interoperable GMES services for environmental risk management in marine and coastal areas (InterRisk) <i>Stein Sandven, Torill Hamre</i>	63

IT for risk and emergency management: Consolidating methodologies for user-centred design <i>Radu-Adrian Mlesnita, Elmar Berger, Gertraud Peinel, Thomas Rose, Bastien Affeltranger</i>	75
Meta-Information – A basic instrument in developing an Open Architecture and Spatial Data Infrastructure for Risk Management <i>Denis Havlik, Gerald Schimak, Ralf Denzer, Ulrich Bügel</i>	85
Novel Approaches to Integrating External Systems in Environmental Information Systems, Illustrated by the Example of the Theme Park Environment <i>Clemens Düpmeier, Werner Geiger, Claudia Greceanu</i>	100
Ontology to Support Knowledge Representation and Risk Analysis for the Development of Early Warning System in Solid Waste Management Operations <i>Ioannis M. Dokas</i>	109
Open Service-oriented Architecture for Environmental Risk Management Applications <i>Thomas Uslander, Ralf Denzer, Reiner Güttler</i>	120
Risk Assessment for the Road Network in the French-Italian Border Region Using Web Services <i>John Douglas, Jean-Jacques Serrano, Jérémy Comte, Olivier Bouc, Claire Arnal, François Robida, Hormoz Modaressi, Martin Atkinson, Jean-Pierre Nordvik, Christiaan Logtmeijer, Graham Vowles, Ian Holt</i>	130
SANY (Sensors Anywhere) Integrated Project <i>Denis Havlik, Gerald Schimak, Ralf Denzer, Bernard Stevenot</i>	140
Supporting interoperable interpolation: the INTAMAP approach <i>Edzer Pebesma, Gregoire Debois, Matthew Williams, Dan Cornford, Ben Ingram, Lucy Bastin, Tony Beaumont</i>	147
Water Protection Information Management by Syntactic and Semantic Interoperability of Heterogeneous Repositories <i>Domenico Gendarmi, Filippo Lanubile, Giovanni Semeraro, Attilio Colagrossi, Oriana Licchelli</i> ...	158
Web based information systems in environmental research projects <i>Claus Mueckschel, Wolfgang Koehler</i>	169
WIN: a new Service Oriented Architecture for risk management <i>Cecile Monfort, Christian Alegre, Pascal Lazaridis</i>	179

ICT TOOLS FOR ECOLOGICAL AND HUMAN RISK ASSESSMENT

“SCIER” - Sensor & Computing Infrastructure for Environmental Risks <i>Tomas Metelka, Marc Bonazountas</i>	193
---	-----

Predictive Modeling of Biological Communities in Biomonitoring Network: Case Study of ARROW Project of WFD EU Implementation in the Czech Republic <i>Jirí Jarkovský, Radim Klapka, Klára Kubošová, Danka Némethová, Jaroslav Ráček, Jan Hodovský</i>	200
SADA: A Freeware Decision Support Tool Integrating GIS, Sample design, Spatial Modeling, and Risk Assessment <i>Robert N. Stewart, Thomas Purucker, George Powers</i>	211
The Risk Assessment Information System (RAIS): Insights from the Evolution of an Online Region-Specific Tool to and International Environmental Risk Assessment Center <i>F. Dolislager, L. Galloway, D. Stewart</i>	222
Type Specific and Multi-Metric Model for Evaluation of Ecological State of Surface Waters: Case Study of ARROW Project of WFD EU Implementation in the Czech Republic <i>Jirí Jarkovský, Radim Klapka, Klára Kubošová, Danka Némethová, Jaroslav Ráček, Jan Hodovský</i>	232

ARTIFICIAL AND COMPUTATIONAL INTELLIGENCE FOR ENVIRONMENTAL MODELLING

Development and Application of a Component-based Generic Farm System Simulator Implementing a Semantically Enriched Integrated Modelling Framework <i>David Huber, Sander Janssen, Eelco Meuter, Kamel Louhichi, Hongtao Li, Andrea Emilio Rizzoli, Ioannis N. Athanasiadis</i>	245
Identification of Pollution Sources by Machine-Learning Approach <i>Jan Žižka</i>	259
Rule-Based Mapping of Ontology-Annotated Data into System Dynamics Conceptual Model Components <i>Virginia Brilhante, Vítor Batista</i>	269
Towards an Automatic Interpretation of Ocean Satellite Images by means of Artificial Intelligence Techniques <i>Josa A. Piedra, Manuel Cantón, Francisco Guindos</i>	281
Use of Fuzzy Set Modeling in Assessment of River Management Measures: Dealing with Qualitative Knowledge and Uncertainties <i>Judith A. E. B Janssen, A. Y. Hoekstra, J.-L. de Kok, R. M. J. Schielen</i>	290
Use of Ontology of Models in Scientific Model Management <i>Julia Strauch, Halisson M. Brito, Jano M. Souza</i>	300

ENVIRONMENTAL ENGINEERING EDUCATION AND PRESENTATION OF ENVIRONMENTAL INFORMATION TO NON SCIENTISTS

An environmental monitoring data management system for providing stakeholder assurances toward meeting contaminant mass loading policy objectives <i>Nigel W.T. Quinn</i>	312
Communicating Air Quality <i>Karine Léger, Sefvan den Elshout, Hermann Heich</i>	324
Design evaluation for air quality information portals <i>Symeon Retalis, Kostas D. Karatzas</i>	336
Maps as tools for moorland wildfire risk management – smoke and mirrors? <i>S.J. Lindley, J. McMorrow</i>	344
On the Challenge of Creating and Communicating Air Quality Information: A Case for Environmental Engineers <i>Achim Lohmeyer, Leo Wanner, Nadjet Bouayad-Agha, François Lareau, Bernd Bohnet, Daniel Nicklaß</i>	356
Presentation of environmental information to public with spatial information systems <i>Matejicek Lubos, Konradova Jana</i>	368
The Climate Change Collaboratory – A Community Portal Based on Geospatial Web Technology <i>Arno Scharl</i>	379

OPEN SOURCE GIS AND ENVIRONMENTAL MODELING SYSTEMS

A New, Faster, Scalable PitFill Algorithm <i>Daniel P. Ames, Ted Dunsford</i>	386
Data for Environmental Modeling (D4EM): Background and Example Applications of Data Automation <i>Mark H. Gray, Daniel P. Ames, Jo Ellen Brandmeyer, Aaron B. Parks, Laura Wilson, Gerard F. Laniak, Rajbir S. Parmar, Kurt Wolfe</i>	396
Environmental Data Management, Analysis and Modeling in GRASS6 <i>Markus Neteler, Helena Mitasova, Lubos Mitas, Russell S. Harmon</i>	406
Free and Open Source GIS Applications in Environmental Modeling <i>Markus Neteler, Tim Sutton, Daniel P. Ames, Helena Mitasova, Aaron Racicot, Ned Horning</i>	417
Geoinformatica: a modeling platform built on FOSS <i>Ari Jolma</i>	428

Open Source GIS and the BASINS Watershed Modeling System <i>Paul B. Duda , John L. Kittle Jr., Daniel P. Ames, Eric B. Rafn, Russell S. Kinerson</i>	438
Open Source Solar Radiation Tools for Environmental and Renewable Energy Applications <i>Thomas Huld , Marcel Šúri, Tomáš Cebecauer, Jaroslav Hofierka</i>	448
The Environmental Noise Directive (2002/49/EG): User Requirements to Web Map-(WMS) and Web Feature-Services (WFS) on a Federal Level <i>Peter Fischer-Stabel , Kerstin Giering</i>	461
WaterBase: Prototype of Open Source Toolkit for Environmental Modeling using SWAT in MapWindow <i>Chris George, Vimal Sharma, Luis F. Leon</i>	468

SOFTWARE TOOLS AND COMPONENT-BASED ENVIRONMENTAL MODELLING

A web-based metadata reporting tool as backbone for a spatial data warehouse <i>Wolfgang Loibl, Jan Peters – Anders</i>	478
GENESIS-D: Global Environmental Network System of Information for Sustainable Development <i>Roberto Paiano , Andrea Pandurino , Enrico Pulimeno, Elton Palese, Luigi Salvatore</i>	490
Software Structures for Multi-Paradigm Environmental Modelling Frameworks <i>Robert M. Argent, N Marsh , JM Rahman, VG Mitchell</i>	502

INTEGRATED MODELLING AND DECISION SUPPORT SYSTEMS FOR WATERSHED AND LAKE MANAGEMENT – DESIGN AND APPLICATION

Ensemble based prediction for coupled models of weather and air quality <i>Pavel Juruš</i>	514
GIS Extension Prototype UStudio Based on uDig Project <i>Gao Ang , Sun Jian , Zhang Ming-bo , Chen Rong-guo</i>	522
Integrated Modeling of Water Quality using Satellite and Land-based Non-Point Source Models in Canada <i>C.E. Binding , R.P. Bukata , J.H. Jerome, William G. Booty</i>	531

HUMAN FACTORS IN ENVIROMATICS

An Effort to Achieve Organizational Interoperability of Environmental Information - PortalU® and the Environmental Information Infrastructure in Germany <i>T. Vögele , M. Klenke , F. Kruse , H. Lehmann , C. Giffei</i>	540
Discovery of Usability Patterns in Support of Green Purchasing <i>Daryl H. Hepting , Timothy Maciag</i>	550
Information Technology in Support of Sustainable Food Choices <i>S.A.A. Rizvi, Daryl H. Hepting , Timothy Maciag</i>	560

DISTRIBUTED AND PARALLEL ENVIRONMENTAL MODELLING PARADIGMS

Parallel Implementations of the Dynamically Dimensioned Search (DDS) Algorithm <i>David A.B. Swayne, Bryan A. Tolson, Vimal Sharma</i>	573
The application of a steady and unsteady state environmental distribution models on environmental concentrations of PAHs measured in Košetice station between 1996 and 2004 <i>Jiri Komprda , Ivan Holoubek, Klára Kubošová</i>	583
The PAH Source Identification Using Positive Matrix Factorization and Clustering Methods <i>Tomáš Hudík</i>	595
Using Bayesian Belief Networks to Calibrate Environmental Process Models <i>Sloboda Markiyan</i>	604
